

Solartelligence™ "Quote Tracking System"

... an online system that allows the main office to designate who should bid on a given job (based on their own disgression regarding experience / capabilities / manpower / etc).

It also allows a one-stop shopping sort of experience for the main office to see the status of any potential job at any time and generate reports to see who is getting what jobs, and which jobs are in que, on hold, or waiting for a process.
